COMPLETE EXAM JSON SCHEMA & ELIGIBILITY GUIDE

Comprehensive documentation of all supported fields, structures, variations, and maximum possibilities

1. Dual Architecture Overview

The platform processes two types of JSON structures based on whether an examination contains multiple posts/academies or is a single exam:

Architecture Type	Key Rules & Storage	Live Examples
Single Exam (No Divisions)	All eligibility criteria sit at JSON root. posts_classes_courses_departments_academies is "".	CUET-UG, SBI PO, CAT, CTET
Multi-Post Exam	Divisions are comma-separated in root string, with criteria objects placed in academies or posts.	CDS (IMA, INA, AFA, OTA), NDA, SSC CGL

2. Root Identification Fields
